SUMMARY

Highly analytical **Computer Engineering Graduate** and **Software Tester Intern** proficient in meticulous **Manual** and **Automation Testing** using **Selenium WebDriver**. Skilled in validation protocols via **Postman API Testing**, troubleshooting, and tracking lifecycle issues using **Jira**. Eager to bring technical expertise, **detail-oriented precision**, and structural validation skills to a dynamic engineering team as a dedicated **QA Tester**.

EDUCATION

Shree Ramchandra College Of Engineering <i>BE in Computer Engineering; CGPA: 7.23</i>	Pune, India 2021 – 2024
BJS Junior College <i>XII (Higher Secondary School Certificate); Percentage: 60.00%</i>	Wagholi, Pune 2019 – 2020
V.S. Satav Highschool <i>X (Secondary School Certificate); Percentage: 76.20%</i>	Wagholi, Pune 2017 – 2018

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL, HTML/CSS, JavaScript
Frameworks & Libraries: React.js, Angular, Spring Boot, Spring MVC, Hibernate, JUnit, Playwright, TestNG, Log4j2
Databases & Backend: MySQL, MongoDB, REST API, Postman
Tools & Methodologies: Git, GitHub, Selenium, Jira, Salesforce Testing, Manual/Automation Testing, Maven, ExtentReports, GitHub Actions, Docker

PROJECTS

- OpenCart Playwright Automation Framework** | *Java, Playwright, TestNG, Maven, Docker* | [\[GitHub\]](#)
- **Engineered** a thread-safe UI automation testing framework applying the Page Object Model (POM), implementing 15+ automated script verification flows for user authentication, product selection, and checkout funnels.
 - **Architected** an isolated container system using Docker Compose to orchestrate a distributed Selenium Grid hub, completely streamlining multi-browser parallel runtime execution over headless cross-platform systems.
 - **Configured** GitHub Actions CI to run TestNG suites and deploy reports to GitHub Pages.
- OrangeHRM UI Automation Framework** | *Java, Selenium WebDriver, TestNG, Maven, Extent Reports* | [\[GitHub\]](#)
- **Developed** an end-to-end UI automation testing framework for the OrangeHRM platform utilizing Selenium WebDriver and Java, implementing the Page Object Model (POM) to ensure scalable script execution.
 - **Structured** automated testing execution flows leveraging TestNG XML configurations to cleanly handle script assertions, functional test runner setups, and comprehensive verification suite protocols.
 - **Integrated** Extent Reports to automatically output visual HTML dashboards detailing execution logs.
- Tours and Travels Management System** | *HTML, CSS, JavaScript, Angular, React.js, MongoDB* | [\[GitHub\]](#)
- **Developed** an interactive and responsive interface using Angular and React.js, implementing 45+ UI verification checks to validate secure profile logins and registration modules.
 - **Engineered** MongoDB centralized structures to optimize data tracking routes.

EXPERIENCE

- Software Tester Intern** | [\[Certificate\]](#) Jul. 2025 – Feb. 2026
Profound Edutech Pune, India
- **Formulated** and executed 120+ comprehensive manual and automated test cases utilizing Selenium WebDriver and Jira platforms to decrease regression cycles by 20%.
 - **Executed** robust REST API and functional verification protocols by deploying Postman tool integrations to catch critical bugs early and boost product stability by 15%.

CERTIFICATIONS

- Java Fullstack Development** – Anudip Institute | [\[Certificate\]](#) Aug. 2023 – Feb. 2024
- Completed a 7-month full-stack development course focusing on Java backend architecture.
 - Gained hands-on experience with Java, Spring Boot, Hibernate, MySQL, and automated JUnit testing.
- C, C++, Python Programming** – Disha Institute | [\[Certificate\]](#) Jul. 2022 – Jan. 2023
- Studied core programming fundamentals, data structures, and object-oriented methodologies.
 - Developed advanced problem-solving skills focused on writing clean, efficient source code.
